

Department of Housing Follow-up Information

1. A table of what makes up the Governor's \$33.0 million (or updated amount) of housing assistance related to the pandemic.

Program/Activity	Source of Funds	Amount
Temporary Rental Housing Assistance	Cares Act (Federal Treasury)	\$20,000,000
Temporary Mortgage Assistance	EMAP Repayments	\$10,000,000
Eviction Prevention	ESG-CV Funds (Federal HUD)	\$ 5,309,579
Immigrant Rent Relief	General Fund Rollover (State General Fund)	\$ 2,500,000
Rapid Rehousing	ESG-CV Funds (Federal HUD)	\$ 7,591,306

2. For each of the programs discussed (once operating), the number of people who are applying, the number of people who are getting the assistance, and the percentage of those receiving assistance of the total who applied.

This question cannot be answered until the programs are over, unless the committee wants an “as of a date specific”.

3. What disaggregated data is currently available on those requesting and receiving assistance (i.e. income category, household-size, geographic location, race/ethnicity, size-category of landlord where applicable)? Please provide this analysis in spreadsheet form. Are there any additional categories we can expect to see in program analysis later on?

Currently, there is not any disaggregated data available. This will not be available until households are under contract and receiving assistance. Again, this would need to be “as of a date specific”, unless the committee wants information after these programs have ended.

4. Provide the flyers and information that has been provided to municipalities, community organizations and landlord associations regarding the Department’s assistance programs. Please specify which should be shared with landlords specifically.

See attached

5. Provide the list of grassroots organizations/subcontractors working with the Connecticut Institute for Refugees and Immigrants [CIRI] for the rental assistance for undocumented immigrants.

See attached

6. Provide the list of 11 housing counselling agencies working with CHFA. What role do they play in these programs?

See attached - They are assigned to help the tenants properly navigate the programmatic aspects of TRHAP

7. Figures that indicate the size of the homeless or likely to become homeless population before and during the pandemic.

We have no way to determine who is likely to become homeless.

8. What percentage of total 2-1-1 calls have been for housing?

See attached housing report

9. How many people have contacted 2-1-1 for housing? How many received assistance?

See attached housing report

10. How are we evaluating what the needs are (for landlords, for mortgage-holders, for renters, etc.) as time goes on?

Need varies by population group, obviously. We are not generating our own needs data; We are relying on basic demographic analyses prepared by a variety of professional and educational organizations.
